SCHOOL TRANSPORT SOLUTION

NORA

FacyPort

Face-verified boarding. Live on the bus.

A tablet by the boarding door recognises each student as they step on, stamps the record with the time and GPS position, and advances the route by itself — no card, no phone, no queue.

ONE PLATFORM, TOTAL CONTROL

Every part of the school, on the same record.

NORA ERP is the system of record. Every app and device around it reads from and writes to that same record — so a bus boarding, a fee payment and an approved leave are the same data, not three copies of it.

From the boarding door to the people who need to know

One tablet, one camera and one 4G connection. Attendance reaches the student record automatically; the cabin reaches the transport desk live.

01 Nothing to tap or carry
No card, no phone, no queue at the door. A liveness check confirms a real person, not a photo or a screen.

02 Time and place on every scan
Each verification carries the moment and the GPS position it happened at.

03 Keeps working with no signal
Verification and attendance run locally and sync once coverage returns — up to 500 queued scans.

04 One face, one identity
A face already enrolled cannot be registered again under another name. Enrolment is captured from three angles.

WHAT EACH SIDE GETS

For the parent
Verified attendance and a boarding alert the moment their child steps on — no live video, by design.

For the transport desk
Who is on which vehicle, where it is, and what the cabin looks like — live in NORA Transit.

For the school
A defensible transport attendance record tied to the student record, with no daily workload for staff.

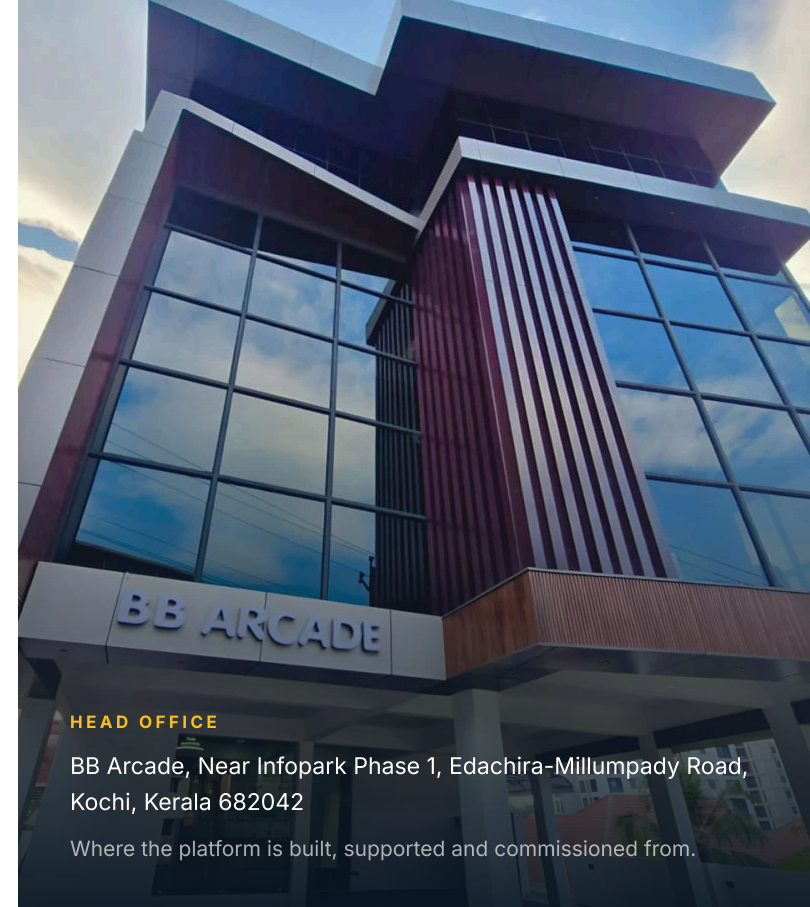

EMPOWERING SCHOOLS. ENABLING EXCELLENCE.

Digitise your institution with **NORA**.

Book a demo and we will walk your team through the platform on your own data — your classes, your fee heads, your routes. Nothing generic, nothing hypothetical.
